Amplifying human senses, Expanding our reality

At Astrodesign's ISE booth(CS650), We will have the following products out for all our customers to take a closer look at. We will also be outputting live video from our 8K camera, allowing you to experience the realism of "Pure 8K" with your own eyes. In recent years, 8K Ultra High-Definition video has been valuable not only for its use as high-quality video, but also for its data. We will introduce examples of how 8K video is being used for sports evaluation, infrastructure and facility inspections, and medical equipment applications and verifications. Please take the time to stop by Astrodesign's booth!

HDMI 2.1 to HDMI 2.0x4 Converter

Supports 8K and 4K and outputs HDMI 2.1 signal to HDMI 2.0 signal in 4 divisions.
Useful for connecting to large LED visions and multi-display systems.

SD-7077

I2G-SDI Audio Monitor

Separates the embedded audio of I2G, 6G, 3G, HD, and SD-SDI signals from the video signals, and monitors audio with the use of the built-in speakers or headphones.
AES,MADI and analog are supported.AM-3825 supports DANTE. AM-3829 supports ST-2110.

AM-3825/AM-3829

A fanless, lightweight and compact 8K camera system

A fanless, lightweight (weight: 340g) and compact (65mmx65mm)8K camera system equipped with a camera sensor featuring a global shutter function. The system consists of a camera head and a CCU. The captured video is output from the CCU in 8K in real-time with 4 lines of I2G-SDI.

AB-4830/AC-4829

Conversion between HDMI 2.1 and I2G/6G-SDI

An interface adapter that can convert between HDMI 2.1 and I2G/6G-SDI signals that support 8K and 4K.It can be used to connect SDI devices to 8K TVs or 4K/120Hz monitors, or to connect game consoles or GPUs to SDI devices.
